AUSTRALIS OIL & GAS LIMITED

ABN 34 609 262 937

Level 29, 77 St. George's Terrace, Perth WA 6000, Australia • GPO Box 2548, Perth WA 6831

Important Notice and Disclaimers

This presentation has been prepared by Australis Oil & Gas Limited ABN 34 609 262 937 (ASX: ATS) (Australis).

Australis means Australis Oil & Gas Limited and, where appropriate, all subsidiaries as at the date of this presentation.

Summary of information: This presentation contains general and background information about Australis' activities current as at the date of the presentation and should not be considered to be comprehensive or to comprise all the information that an investor should consider when making an investment decision. The information is provided in summary form, has not been independently verified, and should not be considered to be comprehensive or complete. The information in this presentation remains subject to change without notice. Australis is not responsible for providing updated information and assumes no responsibility to do so.

Professional or Sophisticated Investor: This presentation is being provided to you on the basis that you are, and you represent and warrant that a) if you are in Australia, you are a "professional investor" or "sophisticated investor" (as those terms are used in section 708(11) and section 708(8) respectively of the Corporations Act 2001 (Cth) ("Corporations Act")) and are also, in each case, a "wholesale client" (as defined in section 761A of the Corporations Act); or b) if you are outside Australia, you are a person to whom an offer and issue of securities can be made outside Australia without registration, lodgement or approval of a formal disclosure document or other filling in accordance with the laws of that foreign jurisdiction, and in either case, you are not in the United States and you are not a U.S. Person (as defined in Regulation S under the U.S. Securities Act of 1933, as amended) ("U.S. Person") and you are not acting for the account or benefit of any U.S. Person.

Not financial product advice: This presentation is not financial product, investment advice or a recommendation to acquire Australis securities and has been prepared without taking into account the objectives, financial situation or needs of individuals. Before making an investment decision prospective investors should consider the appropriateness of the information having regard to their own objectives, financial situation and needs, and seek legal, taxation and financial advice appropriate to their jurisdiction and circumstances. Australis is not licensed to provide financial product advice in respect of its securities or any other financial products. Australis is not licensed to provide financial product advice in respect of its securities or any other financial products. Cooling off rights do not apply to the acquisition of Australis securities. Australis assumes that the recipient is capable of making its own independent assessment, without reliance on this document, of the information and any potential investment and will conduct its own investigation.

Disclaimer: Australis and its related bodies corporate and each of their respective directors, agents, officers, employees and advisers expressly disclaim, to the maximum extent permitted by law, all liabilities (however caused, including negligence) in respect of, make no representations regarding, and take no responsibility for, any part of this presentation and make no representation or warranty as to the currency, accuracy, reliability or completeness of any information, statements, opinions, conclusions or representations or in this presentation. In particular, this presentation does not constitute, and shall not be relied upon as, a promise, representation, warranty or guarantee as to the past, present or the future performance of Australis.

Future performance: This presentation contains certain forward-looking statements and opinion. Generally, words such as "anticipates", "expects", "intends", "plans", "believes", "seeks", "estimates", "potential" and similar expressions are intended to identify forward-looking statements. The forward-looking statements, opinion and estimates provided in this presentation are based on assumptions and contingencies which are subject to change without notice, as are statements about market and industry trends, which are based on interpretations of current market conditions. Forward-looking statements, including projections, forecasts and estimates, are provided as a general guide only and should not be relied on as an indication or guarantee of future performance and involve known and unknown risks, uncertainties and other factors, many of which are outside the control of Australis. Past performance is not necessarily a guide to future performance and no representation or warranty is made as to the likelihood of achievement or reasonableness of any forward-looking statements or other forecast.

Risks: An investment in Australis' shares is subject to investment and other known and unknown risks, some of which are beyond the control of Australis. You should have regard to the 'Risks' section of this presentation (set out in slides 25 and 26) which outlines some of these risks.

Non-IFRS Measures: References are made within this presentation to certain financial measures that do not have a standardised meaning prescribed by Australian Accounting Standards and International Financial Reporting Standards (collectively, IFRS). Such measures are neither required by, nor calculated in accordance with IFRS, and therefore are considered Non-IFRS financial measures. Field Netback and EBITDA, as defined within the Glossary, are Non-IFRS financial measures commonly used in the oil and gas industry that Australis believes provide useful information to readers in assessing the financial performance and condition of the Company. Non-IFRS financial measures used by the Company, such as Field Netback and EBITDA, may not be comparable with the calculation of similar measures by other companies and should not be construed as an alternative to other financial measures determined in accordance with IFRS.

Not an offer: This presentation is for information purposes only. This presentation is not, and should not be considered as, an offer or an invitation to acquire securities in Australis or any other financial products and neither this document nor any of its contents will form the basis of any contract or commitment. This presentation is not a prospectus and does not contain all the information which would be required to be contained in a prospectus. Offers of securities in Australis will only be made in places in which, or to persons to whom it would be lawful to make such offers. Neither this presentation nor any of its contents may be reproduced or used for any other purpose without the prior written consent of Australis.

No Distribution in the US: This investor presentation is not an offer of securities for sale in the United States. Securities of Australis are not registered under the US Securities Act of 1933, as amended (the "US Securities Act") and may not be offered or sold in the United States absent registration or an exemption from registration under the US Securities Act. No public offer of the securities is being made in the United States and the information contained herein does not constitute an offer of securities for sale in the United States. This presentation is not for distribution directly or indirectly in or into the United States or to U.S. Persons.

Monetary values: Unless otherwise stated, all dollar values are in United States Dollars (US\$). The information in this presentation remains subject to change without notice.

TMS Core – Opportunity Summary

Unique Strategic Opportunity

Substantial Oil Asset with Ability for Growth

Multiple TMS-specific Value Drivers

Strong Well Economics with Upside

- ✓ Proven core with Tier 1 oil productivity already delineated (by over 90 wells)
- ✓ Contiguous and scalable acreage position all within core with long lease life, providing control over future development
- ✓ Base-case well economics already established, with significant upside apparent
- ✓ Infrastructure, commodity pricing, field rules, supportive regulator and local authorities make play attractive
- ✓ Access to all historical data, records and work products to retain lessons learned
- ✓ Unique opportunity for targeted, low-risk accumulation of proven Tier 1 inventory at an entry cost similar to exploration plays
- ✓ Acreage position provides effective control over the TMS Core with over 100,000 contiguous net acres, representing ~400 future net well locations
- No federal leases
- √ 38 operated wells producing >1,300 bbls/day with PDP reserves of 3.7 MMbbl¹
- ✓ Large resource 2P + 2C mid case recoverable estimate of 170 MMbbls¹
- ✓ Path to significant growth in future inventory and reserves through additional leasing as well as down spacing and prospective additional formations
- Recent TMS well oil productivity (over 1,000 bbls/d IP30) already exceeds average of more established basins, with further improvements expected
- ✓ Liquid rich at premium oil pricing (95% oil sold at LLS premium to WTI)
- ✓ GOM zip code = low transport costs, abundant infrastructure and multiple marketing options
- ✓ Royalty rates @ 20%
- ✓ Strong Field Netbacks provide healthy returns
- ✓ Single well NPV(10) of \$5.0m and IRR of 32% (WTI \$55/bbl & \$9.5m well cost^A) using conservative TMS type curve performance
- ✓ ATS drilled full-length wells at a cost of ~\$10.6m^A in 2018/19 target of ~\$9.5m^A achievable with updated YE20 costs and identified improvements & infill drilling.
- Further productivity and cost improvements possible with modern completion design, increased well length and activity level leverage
- ✓ Modest improvements lead to an NPV(10) of \$8.5m and IRR of 57% (WTI \$55/bbl & \$9m well cost^A)

TMS Core – Path to Development

Execution De-risked

Significant development flexibility

- **Productivity Upside**
- **Additional target** horizons

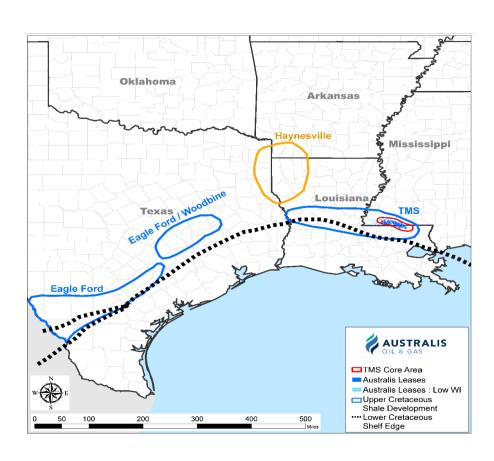

- Reduction in execution risk through the application of technology and accumulated knowledge
- Aggregation of all available data gained by prior participants from over \$1B in capex in TMS and through recent wells drilled by ATS, including:
 - Over 6-year production history on a significant sample of TMS Core wells
 - Cores, logs, microseismic, tracer data and analysis, geo-mechanical earth models, heterogeneous rock analysis and fracture modelling
 - Schlumberger consortium data & analysis contributions from the key operators between 2012 - 2014
 - ATS team direct experience in geosteering, casing point optimisation and fluid property design, all key parameters in executing wells consistently in the play
- ATS & independent experts (K&M) analyzed historic and recent drilling operations, identified key remaining risks
- Established best practice and updated BOD/operations manual for future drilling
- Contiguous operated position and current non-competitive environment provides optionality on timing with control over capital profile and pace of development
 - Long lease life (~66% of acreage HBP or with expiry > Jan 2023)
 - 37,700 acres HBP (35%)
- Mississippi is a very friendly jurisdiction for O&G operators with supportive regulator
 - Favourable forced pooling regime
 - Large units (1,920 acres)
- All TMS Core production results to date achieved using older hybrid frac design largely superseded across the industry - slick water designs never been tested in the TMS
- Longer laterals will improve productivity and economics, already two wells > 9,000 ft
- Australis has identified the studies necessary to confirm such improvements
- Austin Chalk rights across ~ 90,000 acres
- EagleTusc potential observed and preliminarily mapped across acreage

Why TMS remains an undeveloped Tier 1 oil shale play

Current status of TMS core a result of the sequence of local activity and reservoir quality + global oil markets

- TMS is on trend with the Eagle Ford Basin in Texas and in 2010 it's exploration was the logical next step for the industry
- Chasing the trend, operators drilled 91 horizontal wells from 2010 to 2019 and have delineated the relatively small core area
- Performance from early wells drilled before 2012 was variable and unusually binary – based on whether in or outside of the core area
- Early entrants, operators such as EOG and Devon, built big positions outside core, drilled wells with poor results and exited
- Wells drilled in 2012 2014 delineated the core: those inside demonstrated consistently high oil productivity and downward trending well costs as operational challenges were resolved.
- Best results in the core were from Encana drilling program started in 2014, but these were not publicised while they built their lease position.
- Oil price drop in 2014/2015 stopped all activity in play, freezing both development, and public perception, of TMS
- Australis built a core-focused position 2017 2018 through acquisitions and leasing and acquired historical data – including Encana technical and production data, but information on TMS core results remained relatively unknown in US.

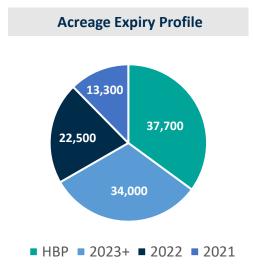

- With the result of its 2018/2019 well program, Australis further confirmed productivity and comparable economics to more established plays, demonstrating the underlying value of TMS core
- Recent third-party operator leasing and drilling prep activity will increase interest in the play.

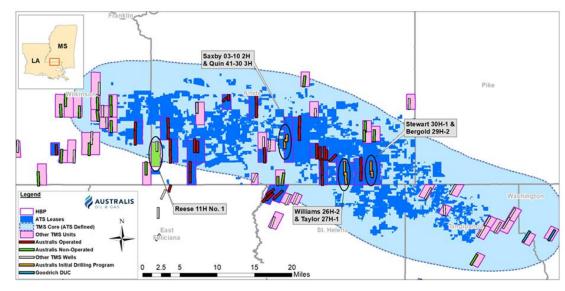

TMS Core – Substantial acreage position with scale and control

- Large contiguous land position in the TMS Core with >100,000 net acres (none on federal lands)
- Ideal location services, infrastructure, roads, pipelines etc
- Development flexibility long lease life and favourable field rules
- Significant inventory of approx. 400 net well locations
- Opportunity to grow acreage position within TMS Core
- Third party activity in leasing and well permitting
- Potential for material acreage increase

TMS Project Asset Profile Mississippi and Louisiana, USA				
Net Acres	~107,500 (37,700 HBP)			
Producing Wells	37 operated 17 non-operated			
Net well locations	~400			

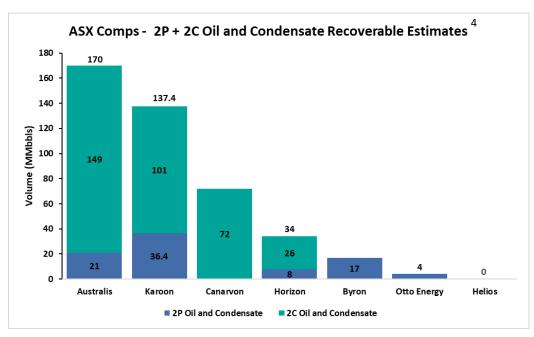

TMS Core - Significant oil reserve and resource

Material mid case recoverable estimate of 170 million bbls independently verified (Ryder Scott LP)¹

Australis TMS Reserves and Resources – as at 31 December 2020

Reserve and Resource category	Australis Net Oil (MMbbls)
Reserves ¹	
Proved Developed Producing (PDP)	3.7
Proved (1P)	10.4
Proved + Probable (2P)	21.0
Proved + Probable + Possible (3P)	27.5
Resources ¹	
Low Contingent (1C)	20.8
Best Contingent (2C)	149.4
High Contingent (3C)	270.7

- PDP Reserves of 3.7MMbbls¹; an **increase** over YE2019³, due primarily to lower achieved operating costs
- PDP NPV(10) of ~US\$47 million¹, at a flat US\$47.02 oil price, increases to US\$55 million² based on WTI strip at 22 February 2021.
- Undeveloped reserves based on very modest development in next 5 years of 58 gross (40 WI) wells on only 10,400 net acres 10% of overall leasehold position
- Remaining net undeveloped leasehold acreage allocated to contingent resource

2020 Operational Performance and Results

Disciplined capital management and TMS asset performance drove strong 2020 results despite challenging market conditions

- Strong Field Netback^C of \$24/bbl (NRI and excluding hedging) provided solid financial base for ATS
 - Operating costs reduced by 13% (on a per/bbl basis) over 2019
 - LLS premium pricing over WTI
- Positive EBITDA^C each quarter full year total US\$7.0m^A despite voluntary Q2 curtailment and price volatility
 - G&A costs reduced by 54%
 - Hedge program delivered an average achieved sales price more than 22% above actual market prices in the field - US\$51.76/bbl
- Net cash flow generated from operations provided additional capacity to service and repay US\$13m^B in debt in 2020 (a 39% reduction from YE 2019 balance) and improved working capital position
- Continued solid ATS well performance and lower costs resulted in YE 2020 PDP¹ volumes increasing by 3% after FY 2020 sales of 13% of YE 2019 PDP³ estimates
- Debt matures in Nov 2023 with minimum quarterly repayments of US\$1 million; interest rate Libor + 6%; full covenant compliance

ATS 2020 Quarterly Results						
	Q1 (Mbbls)	Q2 (Mbbls)	Q3 (Mbbls)	Q4 (Mbbls)	Total (Mbbls)	
Sales Volumes (WI)	170	66	143	125	505	
	(US\$MM)	(US\$MM)	(US\$MM)	(US\$MM)	(US\$MM)	
WI Sales Revenue ^A	9.2	4.4	6.6	5.9	26.1	
Field Netback ^{A,C}	5.0	3.4	3.5	2.7	14.6	
EBITDA ^{A,C}	2.8	1.5	1.9	0.8	7.0	
Facility Interest	0.9	0.4	0.4	0.4	2.1	
Ending Debt Balance	33	23	23	20	20	
Ending Cash Balance	13.9	4.4	6.8	4.7	4.7	

2020 Earnings before tax, depreciation and amortisation US\$4.9m

A - Includes impact of hedging

 $\ensuremath{\mathsf{B}} - \ensuremath{\mathsf{Debt}}$ can be repaid at any time without penalties

C - Field Netback and EBITDA are non IFRS

Evolution and impact of the US Shale Industry

US unconventional growth has heavily influenced global oil markets since 2007

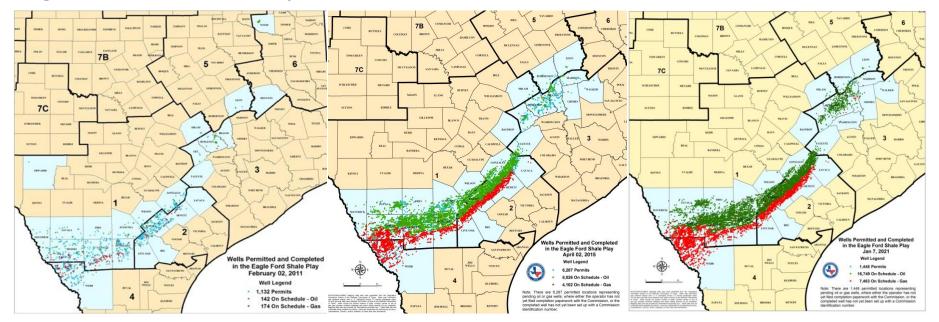

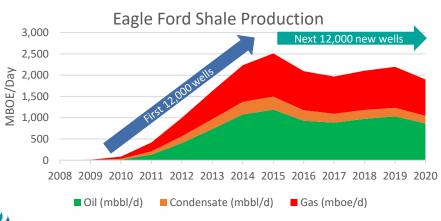

- US oil production grew rapidly during this period to make them the largest producer in the world at over 14 million bbls per day and shale alone as the 4th largest contributor to oil production in the world.
- Practically all growth came from unconventional developments
- Three plays generated almost 85% of the unconventional contribution in 2020: the Permian, Eagle Ford and Bakken
- Eagle Ford and Bakken are now mature were already plateauing by early 2020

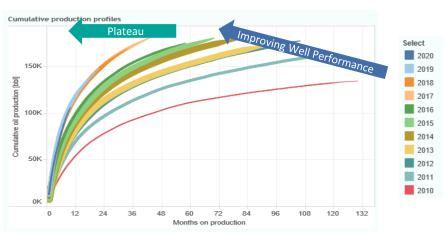

Life Cycle of a Shale Play

Eagle Ford Shale – Delineation, Improvement, Growth then Plateau

Source: Texas Railroad Commission and Shale Profile

Consolidation Occurring in the Permian

Permian Basin – Still plenty of Tier 1 inventory but industry consolidation limits entry opportunities for those companies without exposure

Six material corporate deals in the Permian during 2H 2020 – over 1.1 million acres acquired for US\$42.6 billion

Date	Buyer	Seller	Transaction Type	Value (US\$B)	Existing Basin exposure	Permian Acres Purchased	Combined Permian Acres	Acreage Uplift
Jul-20	Chevron	Noble	Corp	\$13	Permian, DJ, others	92,000	1,700,000	6%
Sep-20	Devon	WPX ^A	Corp	\$5.6	Permian, Bakken	150,000	400,000	60%
Oct-20	ConocoPhillips	Concho	Corp	\$13.3	Permian	550,000	700,000	367%
Oct-20	Pioneer	Parsley ^A	Corp	\$7.6	Permian	250,000	930,000	37%
Dec-20	Diamondback	QEP & Guidon	Corp	\$3	Permian	81,564	429,000	23%
	Total			\$42.6		1,123,564	4,159,000	37%

- Public disclosure from these six transactions indicate a significant number of additional companies were also exploring consolidation opportunities.
- Consistent themes supporting the acquisitions include
 - Increasing Tier-1 assets and drilling inventory to satisfy pressure for accelerating ROC vs. reinvestment/recycle
 - Increasing size and scale
 - Cost synergies reducing operating and overhead costs
- By Jan 2021, following consolidation, the 10 largest acreage holders had amassed 62% of the 22 million acre greater Permian Basin.
- Opportunities to acquire a meaningful position have become more difficult in the Permian basin due to high cost and availability
- Australis believes more parties requiring Tier-1 inventory will have to look to non-Permian opportunities

"the best companies have been picked off in the past few weeks" "can't see much more happening" (Scott Sheffield, CEO Pioneer Natural Resources on acquisition of Parsley Energy, 20 October 2020)

A: See slide 20 for case histories showing both purchased companies acting as consolidator during transactions which closed in Q1 2020.

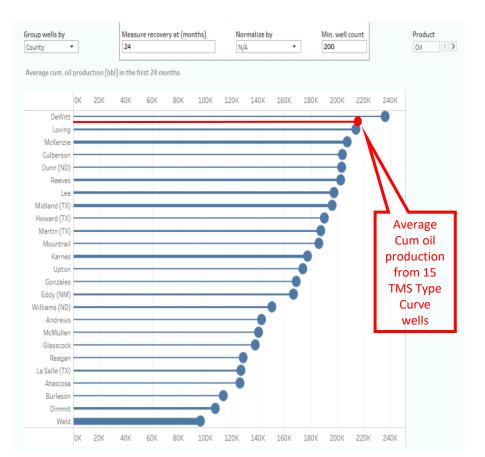

TMS Core – Tier 1 Basin Productivity

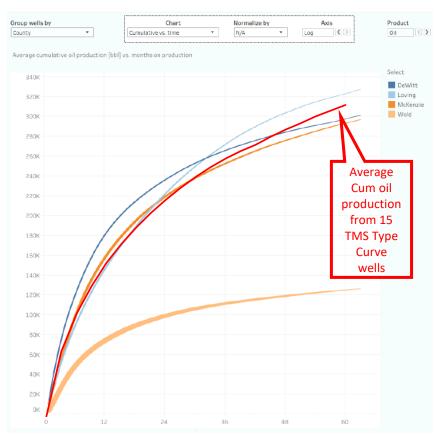

TMS Type Curve well productivity and decline profile outperforms many of the best counties within the four major oil producing basins: the Permian, Eagle Ford, Williston (Bakken) and DJ - Niobrara

24 month cum. Oil Production ('000 bbls)
ATS TMS v best counties within major onshore oil US plays

Average Cum Oil Production v Months on Production

<u>Best Performing County</u> in Each Oil Play

Source: "The Major Tight Oil Basins" from ShaleProfile Insights May 27 2020. ATS TMS 15 well average has been interposed onto the data.

Australis strategy and timing

Valuation is always a product of asset quality and scarcity......empirical data supports TMS Core quality and the US Shale evolution now driving the latter.

- Prior to COVID-19, the US shale industry was going through a structural shift with diminishing Tier 1 inventory locations due to asset maturity and limited access to capital
- Shareholder pressure grew for return of capital over recycling, the result being that shale oil production growth was already slowing prior to the COVID pandemic
- Options for acquiring Tier 1 inventory in developed plays are limited and opportunities in the biggest remaining basin, the Permian, have decreased due to ongoing consolidation
- With the US heavily explored over the last 14 years the TMS Core is one of the only remaining delineated but undeveloped shale plays with Tier 1 oil productivity
- Australis holds a controlling interest within the TMS Core and is custodian of practically all the historical data on the play
- The Company is in a position to drive value for this overlooked and undervalued asset in the evolving post COVID market
- Investing in Australis at current prices is an opportunity to acquire an interest in this asset at entry level / exploration level cost basis, a rare opportunity for a play with proven production we trade at approximately the enterprise value of the existing production, no value for the recoverable bbls in the ground. Our type curve well has an NPV(10) of US\$10/bbl at WTI US\$55/bbl^B

A: Value allocation assumes an EV of US\$53m, an NPV(10) of PDP at US\$55m² and 170 MMbbls¹ mid case recoverable (2P + 2C)
B: This is the economics of a single well (see Slide 17), care should be taken if extrapolating across 400 net locations due to the likely scheduling of those wells and associated discount effect.

Summary

Experienced team and strategy will ultimately drive shareholder returns.

TMS Asset Quality

- Comparable productivity to best areas in the USA. Long production history from 85 wells removes guess work
- Product stream 95% oil and a light sweet crude demands a premium to WTI
- ATS has shown base case well economics, with all other plays having shown incremental improvement during development

Shale Industry Transformation

The broader shale industry is facing a structural transformation due to the following:

- Diminishing Tier 1 inventory locations
- Limited opportunity for exploration or new field developments
- Remaining growth play, Permian, tightly held

Strategic Advantages of TMS

- Large resource of oil
- Proximity to infrastructure
- Known well spacing with >6 year production history
- Supportive legislative environment with no federal leases
- Modest and flexible capital requirements
- Potential for acreage growth

Australis Capital Raise

Having managed and protected the asset during the turmoil of 2020, Australis is seeking to raise funds to

- Allow for the maintenance of key leaseholds to retain control
- Strengthen balance sheet for engagement with potential partners
- Provide capacity to repay further debt, although covenants in good standing
- General working capital requirements

Additional Information

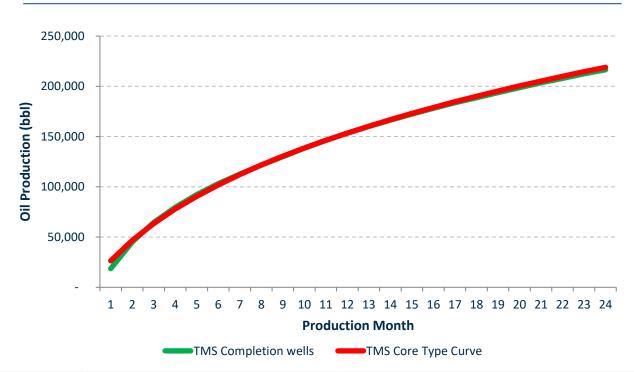

Single Well TMS Type Curve

TMS Type Curve is a simple history match to averaged data from 15 ATS operated wells drilled in 2014

TMS Type Curve – Assumptions

- Oil EUR 610 Mbbls
- Gas EUR 159 MMscf
- NGL EUR 20 Mbbls
- EUR (30 yr) 656 Mboe
 (97% liquids)

TMS Core Type Curve v TMS Production

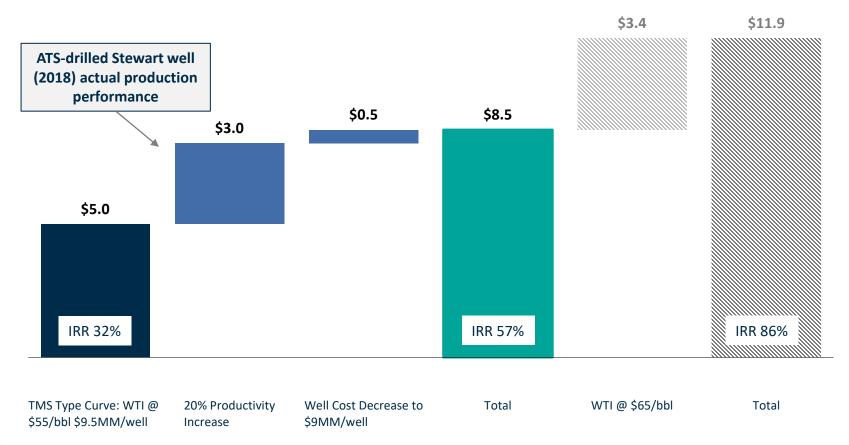

Type Curve	Well EUR	Basis
TMS Type Curve	656 Mboe	History match average of the 15 wells spudded by Encana in 2014 (~7,200 ft stimulated lateral)
TMS Productivity Upside	787 Mboe	20% uplift of the TMS Type Curve which is less than the industry average improvement in well performance (normalised) since 2014

Large Well Inventory with Attractive Economics

Each of the ~400 net well locations has a conservative base-case NPV(10) of \$5.0 million @ WTI \$55/bbl

Single Well Economics NPV10^A

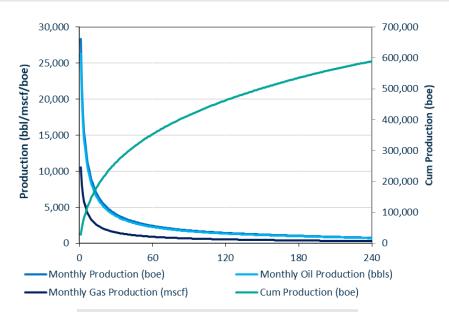

Strong Field Netbacks in TMS Core Driven by Multiple Factors

Tier 1 oil well productivity in the TMS Core

- TMS Type Curve based on average of 2014 ATS well performance and consistent with Ryder Scott 2P case
- Australis TMS wells drilled in 2019 performing at or above 2014 ATS TMS wells, with IP30 > 1,000 bbls/d for full length laterals
- These wells produce 216 mbbls in first 24 months performance that is on par or better than the best areas in
 the Permian, Bakken, DJ Basin and Eagle Ford
- TMS production is liquids rich at premium pricing
 - >95% oil with 39-41 degree API
 - Achieves LLS-type premium over WTI (2019 average ~\$5.60 and 2021 YTD average: ~\$2.01)
- Competitive Opex for oil wells
 - Artificial lift a combination of jet pumps and long stroke rod pumps
 - Low transport costs due to proximity to existing infrastructure and multiple nearby refining markets
 - Access to and capacity for water, SWD, roads and power
- Low well royalty rate (~20% average)
- Contiguous operated position enables efficient manufacturing approach to development with full control over infrastructure, drilling locations and pace of drilling

Decline curve based on history match to average of the 15 2014 ATS wells

EUR (30 Years) – based on average historical performance						
Gas	0.16	Bcf				
Oil/Condensate	610	Mbbl				
NGLs	20	Mbbl				
EUR/well	656	Mboe				

Forward field production from ATS Operated TMS Core* Gross (8/8ths) volume

FY 2021	~540 mbbls
FY 2022	~450 mbbls

^{*} Estimates solely based on ATS year end 2020 reserves evaluation production profile for existing ATS-operated wells

Case Study – Delaware Basin vs TMS

Two recent 'Tier 1' transactions highlight the comparative value of the TMS ^{6,7}

WPX acquires Felix Energy for US\$2.5 B (cash & stock) – December 2019

 58,500 net acres, 60,000 boe/d production (70% oil), 190 wells drilled, 1,500 gross locations. At \$30k/boe/d equates to \$12,000/acre

Parsley acquires Jagged Peak Energy for US\$2.3 B (stock) - October 2019

■ 78,000 net acres, 38,300 boe/d production (76% oil). At \$30k/boe/d equates to \$6,500/acre

Productivity Comparison with Australis TMS well performance	12 month Cum bbl oil	Lat Length ft	bbl/ft	Net (post royalties) bbl/ft
Wells highlighted by the Acquirer				
Felix Average – 21 Wells	233,619	9,964	23.5	17.6
Jagged Peak Average – 35 Wells	193,400	8,658	22.3	16.8
Australis TMS Wells				
TMS Type Curve 15 Wells (Encana 2014 wells)	153,356	7,254	21.1	16.9
Stewart 30H-1 Well	188,754	6,845	27.6	22.1
Taylor 27H-1 Well	136,508	6,555	20.8	16.6

Comparison of key parameters – net oil production, water cut, cost and achieved price

- Average Felix wells 17.6 bbl/ft, Jagged Peak 16.8 bbl/ft and TMS Type Curve 16.9 bbl/ft
- Jagged Peak well cost (2018) \$1,500/hz ft; Stewart \$1,519/hz ft and Taylor \$1,632/hz ft
- Jagged Peak wells average water production 61.6 bbl/ft and TMS Type Curve 10.5 bbl/ft
- Achieved oil price Q3 2019 Jagged Peak \$53.55/bbl, ATS \$59.60

Subsequent to these transactions, both acquirers have now been consolidated themselves – see slide 11

Australis Corporate Snapshot at 6 Mar 2021

Well positioned after 2020 with experienced and invested Management Team

Key ATS Financial Statistics for FY 2020		Board & Management	: – Ex Aurora Founders & Management
Average Sales (WI)	~1,380 bbl/day	Jon Stewart	Non-Executive Chairman

Period	Volume Hedged (mbbls)	% of YE20 RS PDP	AVG. WTI Floor Price (\$/bbl)		
2021	277	75%	\$46		
2022	45	14%	\$49		
2023	4	9%	\$50		

A: The Company completed Tranche 1 of Placement raising A\$7.5 million in early March 2021. Tranche 2, the Directors commitment to the 15% placement, of A\$0.675 million will settle following approval by shareholders at the AGM in May 2021. In addition an SPP is currently on offer to retail shareholders at the same price as the placement, 5 cents per share, to raise up to a capped maximum amount of A\$2 million.

Footnotes

- 1. All estimates and risk factors taken from Ryder Scott, report prepared as at 31 December 2020 and generated for the Australis concessions to SPE standards. See ASX announcement released on 5 February 2020 titled "Reserves and Resources Update Year End 2020". Australis is not aware of any new information or data that materially affects the information included in the referenced announcement and all the material assumptions and technical parameters underpinning the estimates in the original announcement continue to apply and have not materially changed. Ryder Scott generated their independent reserve and contingent resource estimates using a deterministic method which is based on a qualitative assessment of relative uncertainty using consistent interpretation guidelines. The independent engineers using a deterministic incremental (risk based) approach estimate the quantities at each level of uncertainty discretely and separately.
- 2. Updated PDP NPV(10) of US\$54.9 million uses the PhDWin model created by Ryder Scott for the PDP year end 2020 estimates¹ with an updated oil price assumption using the forward strip on 22 February 2021 (2021 US\$57.20/bbl; 2022 US\$53.30/bbl; 2023 US\$50.90/bbl; 2024 US\$49.67/bbl and 2025+ US\$49.10/bbl) with an effective date 1 March 2021. All other assumptions on production profiles and operating cost were retained as per Ryder Scott model inputs and Australis is not aware of any new information or data that materially affects them.
- 3. Estimates from the independent Ryder Scott report, effective 31 December 2019. The report was prepared in accordance with the definitions and disclosure guidelines contained in the Society of Petroleum Engineers (SPE), World Petroleum Council (WPC), American Association of Petroleum Geologists (AAPG), and Society of Petroleum Evaluation Engineers (SPEE) Petroleum Resources Management (SPE-PRMS) as revised in June 2018. Ryder Scott generated their independent reserve and contingent resource estimates using deterministic methods.
- 4. Based on public data including reserve announcements and annual reports from ASX Peer Companies with oil weighted portfolios.
- 5. Oil equivalent volumes are expressed in thousands of barrels of oil equivalent (Mboe), determined using the ratio of 6 Mscf of gas to 1 bbl of oil
- 6. Analysis of data sourced from WPX Energy Investor Presentation "Acquisition of Felix Energy" 16 December 2019 & Texas Railroad Commission completion reports
- 7. Analysis of data sourced from Parsley Energy Investor Presentation "Acquisition of Jagged Peak Energy" 14 October 2019, Texas Railroad Commission completion reports, ShaleProfile.com & Jagged Peak Energy Q3 report.
